

CHRISTMAS ART PROPOSAL

SCULPTURAL CHRISTMAS OBJECTS & HOSPITALITY INSTALLATIONS

SCULPTURAL CHRISTMAS OBJECTS

ART, LIGHT, RITUAL & HOSPITALITY

This proposal presents two one-of-a-kind sculptural Christmas works conceived as art objects first and seasonal installations second.

Rather than conventional Christmas decoration, each work is built around a recognizable character, material presence and its own visual narrative. The objects can stand independently in a gallery-like setting or become the centre of a larger hospitality installation.

The surrounding environment can be adapted to the architecture of a hotel, lobby or private interior - using trees, natural branches, warm light, candles, glass, woodland elements and seasonal objects without changing the original artwork itself.

The visualizations demonstrate possible settings. The original sculptures remain the focal point.

ORIGINAL ARTWORK / ADAPTABLE INSTALLATION / SEASONAL ENVIRONMENT

I. THE PROMISE OF TOMORROW

ORIGINAL SCULPTURAL CHRISTMAS OBJECT

Bright as a small sun, the boy becomes a Christmas tree without losing his identity as a sculptural character. His radiant head, layered tree silhouette and hanging ornaments turn the familiar seasonal form into an image of hope, light and the future.

The work can be presented as an independent sculptural object or placed at the centre of a larger installation. Its presentation height is adjustable, allowing it to respond naturally to the proportions of each interior.

In hospitality settings, a complete Christmas landscape can be created around the sculpture while the original artwork itself remains unchanged.

II. ILLUMINATED FIGURE

PAPIER-MACHE, CHINESE SILK, GLASS & LIGHT

This sculptural woman combines papier-mache, Chinese silk and an illuminated glass construction designed to hold Christmas ornaments.

The transparent glass structure becomes part of the figure and part of the seasonal display: ornaments can be arranged within it, while the figure itself is illuminated from inside.

Light is therefore not an added decorative effect. It is integrated into the construction and changes the presence of the work between day and evening.

The figure can stand independently as a functional light sculpture or become the centre of a larger Christmas installation created around the original artwork.

HANDMADE, ONE-OF-A-KIND ARTWORK

KUPRAVA CREATIVE

ART AT THE CENTRE OF CHRISTMAS

Both sculptures are complete, independent artworks. The installation concept does not redesign or alter them; it creates a temporary seasonal environment around each original piece. The scale, density and atmosphere of the surrounding Christmas setting can be adapted to a specific hotel, lobby or interior.
