THE SCULPTURE

HOMAGE TO SALVADOR DALI - CHRISTMAS SCULPTURE PROPOSAL

CONCEPT

A CONTEMPORARY HOMAGE TO SALVADOR DALI

This sculptural Christmas installation is conceived as a contemporary homage to Salvador Dali and to the dreamlike visual language associated with Surrealism.

Its elongated golden silhouette, sculptural lips, egg-like forms and butterflies transform the traditional Christmas tree into a monumental art object - theatrical, luminous and deliberately unexpected.

The proposal is intended as a site-specific commission rather than conventional seasonal decoration. It can be developed for major galleries, cultural institutions, luxury retail destinations, landmark public interiors and high-profile seasonal installations.

The final scale, engineering, lighting and installation system would be developed for the selected site while preserving the central artistic concept.

PRODUCTION & REALIZATION

PROPOSED MATERIAL DIRECTION

- Engineered internal steel structure for stability and safe vertical support.
- Sculpted fiberglass or lightweight composite shell for the elongated surrealist geometry.
- High-gloss metallic gold finish with protective lacquer and lacquered red sculptural details.
- Lightweight metal or composite butterflies and egg-like ornamental elements.
- Integrated architectural lighting and engineered base, adapted to the final venue.
- Dimensions, structural calculations, installation method and local technical compliance to be developed for the commissioned site.

INTERNATIONAL COMMISSION

HONG KONG / SPAIN / DUBAI / UNITED STATES

The project is available for international site-specific commission. Scale, footprint and technical realization can be adapted to the architecture and public circulation of the selected destination.

The proposal is suitable for major gallery and cultural spaces, landmark retail environments, public interiors and large seasonal art programs.

Commission scope and price are developed according to scale, engineering, fabrication, transport and installation requirements.
