

PINOCCHIOS' LIBRARY

A NEW YORK CITY CONCEPT PROPOSAL

*“As many Pinocchios can exist as there are logs -
if there is someone who can carve a person out of a log.”*

A child's thought and drawing became the starting point for an artist's library concept.

ORIGINAL THOUGHT & FIRST DRAWING

Melita Iosava

PROJECT AUTHOR, ARTIST & DESIGNER

Miranda Kuprava

Developed from Melita's childhood drawing and the conversations it began between daughter and mother

How It Started

IN MELITA'S OWN WORDS

My name is Melita Iosava. I am 12 years old.

When I was nine, after I first read Carlo Collodi's The Adventures of Pinocchio as a complete story, one thought stayed with me: why should there be only one Pinocchio?

Pinocchio begins as a piece of wood. I thought that if one piece of wood could become a person, then there could be as many Pinocchios as there are logs - if there is someone who can see the person inside the wood.

I drew what I imagined: many different Pinocchios. I showed the drawing to my mother, Miranda Kuprava, who is an artist and designer. I shared the idea with her, and we began talking about becoming a person, truth, conscience, mistakes, and the people who help us grow.

My mother saw that my drawing and our conversations could become something larger. She developed them into Pinocchios' Library - the architecture, the rooms, the functional sculptures, the lights and the artistic language of the project.

Melita Iosava, age 12

Original thought and first drawing

From a Child's Thought to a Library

THE REAL AUTHORSHIP OF THE PROJECT

Melita's role is the origin: the thought that Pinocchio need not be only one, the first drawing of many Pinocchios, and the conversations that followed.

Miranda Kuprava's role is the project: she recognized the spatial potential of that thought and developed Pinocchios' Library as an artistic, architectural and functional concept.

CREDITS USED THROUGHOUT THIS PROPOSAL

Melita Iosava - original thought and first drawing
Miranda Kuprava - project author, artist and designer

AI - visualization aid only

1. TREE

Every story begins in nature.
A tree grows, gives life and holds endless possibilities.

2. LOG

A tree becomes a log.
In a simple piece of wood a new life is waiting.

3. WOODEN PUPPET

A log can become a person in the hands of a master.
Imagination, care and time bring it to life.

4. A BOY

The puppet learns, experiences, makes mistakes, tells the truth and becomes a real child.
Conscience and kindness guide the way.

5. A BOOK

Every child has a story to tell.
From life and mistakes grow stories that inspire others.

6. A LIBRARY

Many stories together create a library.
A place where children read, imagine, learn and grow.
A place where every log can become a person, and every person a better world.

PINOCCHIOS' LIBRARY

Original thought & first drawing - Melita Iosava

Refined the idea & drawings - Miranda Kuprava

PINOCCHIOS' LIBRARY - NEW YORK CITY CONCEPT PROGRAM

The Core Idea

TRANSFORMATION IS THE CURRICULUM

“A library is one of the places where possibility is given a chance.”

Project philosophy

The project uses Pinocchio as a universal literary metaphor for growth: curiosity, mistakes, truth, conscience, kindness and the possibility of becoming. The visual language is original and does not use Disney artwork or character assets.

Why New York

MELITA'S PERSONAL CONNECTION - AND THE PROJECT'S CIVIC AMBITION

“For me, New York feels like the center of the world - a capital of possibility. I dream of seeing New York at Christmas, and I hope one day to continue my education in America. That is why I would love New York to be the first city where we seriously present this idea.”

WHY THE PROJECT FITS NEW YORK

- A CITY OF POSSIBILITY** The project's central metaphor is becoming: the possibility that something unfinished can grow into a person, a story and a future.
- A CITY OF MANY STORIES** New York brings different languages, families, histories and ambitions into one shared public life.
- A PUBLIC LIBRARY, NOT A THEME PARK** The proposal is conceived as a real cultural and reading space, with wonder serving literacy, imagination and community.
- A PLACE CHILDREN CAN HELP GROW** Children can contribute drawings, stories and ideas over time, allowing the institution to remain alive rather than visually fixed.

PINOCCHIOS' LIBRARY

As many Pinocchios can exist as there are logs —
if there is someone who can carve a person out of a log.

Original idea & drawing — Melita Iosava, age 12
Artistic & technical development — Miranda Kuprava

PINOCCHIOS' LIBRARY

A Library of Many Pinocchios

Every child has a Pinocchio inside — curious, honest, sometimes naughty, full of questions and dreams.

Here, the Pinocchios of children's drawings become sculptures, stories and friends.

Tree → Paper → Drawing → Art

A place where imagination always tells the truth.

DAY VIEW

NIGHT VIEW

PINOCCHIO DETAIL
Hand-carved and painted wood.

ENGINE DETAIL
Functional light, handcrafted finish.

WING DETAIL
Integrated lighting.

JIMINY CRICKET LIGHT
Conscience is light.

SIDE VIEW
For reference.

Small lights. Big lessons.

MATERIAL
Wood, metal, light.

Conscience Is Light

THE TALKING CRICKET BECOMES A FUNCTIONAL LIGHT MOTIF

THE TALKING CRICKET - NOT A DISNEY CHARACTER

Collodi's original story includes the Talking Cricket, a voice that confronts Pinocchio with uncomfortable truths. In the library, that literary idea is translated into light: small cricket-shaped fixtures appear in reading spaces as a quiet symbol of conscience.

CONSCIENCE IS LIGHT.

Present, useful and never theatrical - a literary metaphor turned into functional design.

The fixtures are concept objects only. Final materials, photometrics, electrical components, mounting, fire performance and child-safety requirements would be resolved with licensed professionals during technical development.

Conscience
is light.

Always watching.
Always reminding.
Always with you.

DETAIL
Handcrafted. Real materials. Real light.

CEILING FIXTURE
Simple and safe installation.

WINGS
Translucent acrylic or resin
with delicate structure.

MATERIALS

Brass / Bronze
(handcrafted)

Recycled paper
(papier-mâché)

Acrylic / Resin
(translucent)

Wood
(ceiling & interior)

Textile cable
(black)

TECHNICAL DETAIL

THE READING GARDEN - FURNITURE DETAILS

THE DOVE

THE SNAKE

THE SNAIL

The Reading Garden

FUNCTIONAL OBJECTS INSPIRED BY COLLODI'S WORLD

A ROOM TO ENTER, NOT JUST VIEW

This quieter reading room turns literary imagery into useful furniture. A white dove becomes a child-sized reading seat. A snail becomes a circular bookcase and protected reading nook. A snake becomes a long shared bench with books stored beneath the seat.

The purpose is not to decorate the library with characters. It is to let a child physically inhabit a story - to read on it, inside it, beside it and with other children.

FLOATING LIGHTS
Jellyfish at different heights — some low, within reach.

FISH MOVEMENT
A school of light, flowing towards the whale.

WATER SPOUT DETAIL
Laminar water streams with a soft curtain. The water falls into a circular sink, keeping children dry.

FISH LIGHT DETAIL
Handcrafted glass, soft internal light.

JELLYFISH DETAIL
Translucent materials, warm and cool light.

PINOCCHIOS' LIBRARY
Children's Restroom Concept

Every detail tells a better story. ♥

THE WHALE - HOW CHILDREN USE THE SPACE

BOYS - HANDWASHING

WATER FALLS INTO A CIRCULAR SINK

RLS - INSIDE THE WHALE

CHILD INSIDE THE WHALE

WATER PLAY SYSTEM

REAL USE / CHILD SCALE

How the Library Works

A CULTURAL PROGRAM, NOT A STATIC INSTALLATION

READ

Children's and family collections, storytelling, quiet reading, school visits.

MAKE

Papier-mâché, drawing, simple woodworking demonstrations, recycled-material workshops.

EXHIBIT

Original children's drawings shown beside selected interpretations and prototypes.

GATHER

Family reading, intergenerational events, talks with artists, writers and makers.

GROW

The library can accumulate new stories over time rather than remaining visually frozen.

“The project is complete only when children begin adding their own stories to it.”
